City Begins Drainage Improvements on Canyon Creek Road

The City has closed east and westbound Canyon Creek Road to replace failing drainage culverts. Erosion had begun to deteriorate the 16-year old metal culverts in the creek under Canyon Creek Drive. The heavy rain events and flooding expedited the failure which caused damage to the street pavement on Canyon Creek Drive. The drainage improvement project will replace the existing metal culverts with longer lasting concrete box culverts and repair and replace the damaged pavement on Canyon Creek Drive.

During this project, the east and westbound lanes of Canyon Creek will be closed to traffic to allow the contractor to replace the culvert pipes. The emergency access to Longfellow Drive located in the northwest corner of the Canyon Creek subdivision is open and available for use as a route to Highland Village Road. The project should be complete by late winter 2017.
